International Journal of Engineering and Technology

CONTENTS

Volume 9, Number 2, April 2017

- **Coastal and Ocean Engineering**

Effect of Plateau Length on the Transformation of Internal Solitary Waves.....89
Ming-Hung Cheng, Chih-Min Hsieh, Robert R. Hwang, and Shih-Feng Su

Water Wave Interaction by Dual Cylindrical Cylinders with Partial Porous Area.....97
Min-Su Park, Youn-Ju Jeong, and Young-Jun You

Comparison of Three Ways to Assess the Influence Range of Different Artificial Reefs.....105
Huang Luiyi, Cheng Hui, Tang Yanli, Yang Qian, and Wang Xinxin

Experimental Study on Shape Dependent Wave Force of Offshore Support Structures.....111
Youn-Ju Jeong, Min-Su Park, and Young-Jun You

Analysis of Egyptian Red Sea Fishing Ports.....117
Mahmoud Sharaan, Abdelazim Negm, Moheb Iskander, and Mohamed El-Tarabily

An Experimental Study of Wave Runup: Cylinder Fixed in Waves versus Cylinder Surging in Still Water.....124
Deping Cao, Edmond Lo Yat-Man, Wei Jian, and Zhenhua Huang

Experimental Study of the Effect of the Spreading Buoyant Gravity Current on the Coastal Environment.....129
Dhafar Ibrahim Ahmed, Noureddine Latrache, and Blaise Nsom

- **Marine Engineering**

A General Technical Route for Parameter Optimization of Ship Motion Controller Based on Artificial Bee Colony Algorithm.....133
Yanfei Tian, Liwen Huang, and Yong Xiong

- **Mechanical Engineering**

Experimental Study of Performance and Emissions of Fusel Oil-Diesel Blend in a Single Cylinder Diesel Engine.....138
Omar I. Awad, Rizalman Mamat, Obed M. Ali,Mohd Fahmi Othman, and A. A. Abdullah

- **Communication and Network Engineering**

A New Document Sharing System Based on a Semantic Hierarchical Peer-to-Peer Network.....143
Anis Ismail, Aziz Barbar, Mohammad Hajjar, and Mohamed Quafafou

Routing Algorithm for Wireless Multi-hop Networks with Tree Topology for Smart Meter Systems.....150
Takaaki Suetsugu and Hiroshi Furukawa

- **Computer Science and Applications**

Enhancement of Newton Law of Cooling Method Based on Asante's Algorithm with Henssge Nomogram Method in Estimating the Time of Death.....155

Noor Maizura Mohamad Noor, Muhammad Bin Che Abdullah, and Zuriana Abu Bakar

A New Algorithm Based on Item Clustering and Matrix Factorization.....160
Xu Wang, Xingjun Wang, Zhixiong Ding, Xinxin Nie, and Linghao Xiao

A Feasible Program Organizational Architecture Framework.....166
Adel Alblawi, Jerrell Stracener, and Jeffery Williams

A Hierarchical Document Clustering Approach with Frequent Itemsets.....174
Cheng-Jhe Lee, Chiun-Chieh Hsu, and Da-Ren Chen

Use of Round Shape Bootstrap Samples for a Classifier Design.....179
Yoshihiro Mitani, Yusuke Fujita, and Yoshihiko Hamamoto
